1. Introduction	97
2. Regulatory challenges	98
3. Final considerations.....	99

Foreword

“La pierre n’a point d’espoir d’être autre chose que pierre. Mais de collaborer elle s’assemble et devient temple.”¹

Antoine de Saint-Exupéry

It gives us great satisfaction to publish this compilation of articles on the legal aspects of the most pertinent issues for the aviation industry in 2019.

The book, which marks and celebrates the first year of the Aviation practice at Mattos Filho, Veiga Filho, Marrey Jr. e Quiroga Advogados, is the outcome of the collaboration among several of our professionals, especially those comprising our Aviation, Litigation and Arbitration, Antitrust, Compliance and Corporate Ethics, Corporate Investigations, Business Public Law, Infrastructure and Energy, Insurance, Reinsurance and Pensions, Corporate/M&A, Labor and Employment and Executive Compensation and Tax practices areas.

The integration of our practices, as seen in this book and in our day-to-day work, enables us to provide our clients with a multidisciplinary service. Thanks to the convergence of our professionals’ experiences and specialties, we have developed personalized solutions for each transaction, responding to the objectives and needs of our clients on all fronts of the aviation industry.

To contribute to the preface of this book we invited Mr. Ricardo Fenelon Junior, a former director at the Brazilian Civil Aviation Agency (Anac) between 2015 and 2019, who, during his term of office, played an important role in the implementation of relevant enhancements in the development of the civil aviation industry.

Fasten your seatbelts and enjoy your flight!

Adriana Simões

Partner at Mattos Filho, Veiga Filho, Marrey Jr. e Quiroga Advogados

¹ “Stones have no hope of being anything but stones. However, through collaboration, they get themselves together and become a temple.”
